To use the system, user has to install any web browser. New update version of web browser is recommended. For server computer user has to install xampp. Minimum RAM is 512 MB and minimum disk space is 2 GB to use the system. System can be used in any computer, any operating system.

Installation

First, user has to install xampp. Xampp installer is in the supporting tools folder in the disc. Then with any web browser in any devices, client user can use the system.
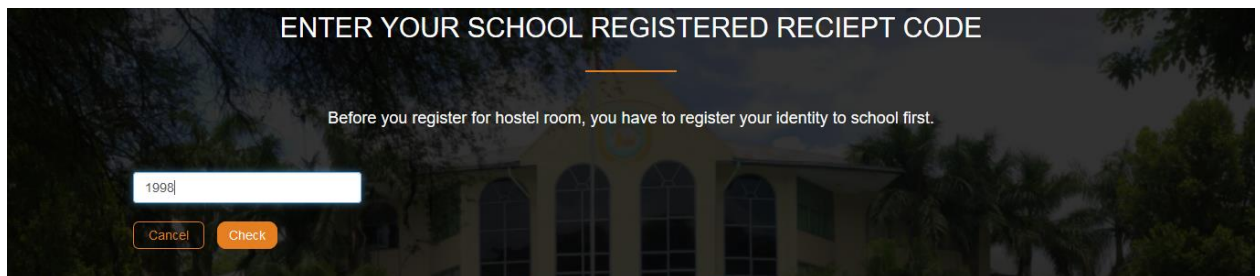

How to Use System

Home Page

Hostel Allocation System is designed to helps you to allocate hostel room and view students and payment easily and fast. Home page is viewing when user entering the website. It shows the facility of the school hostel and the advantages of the system.
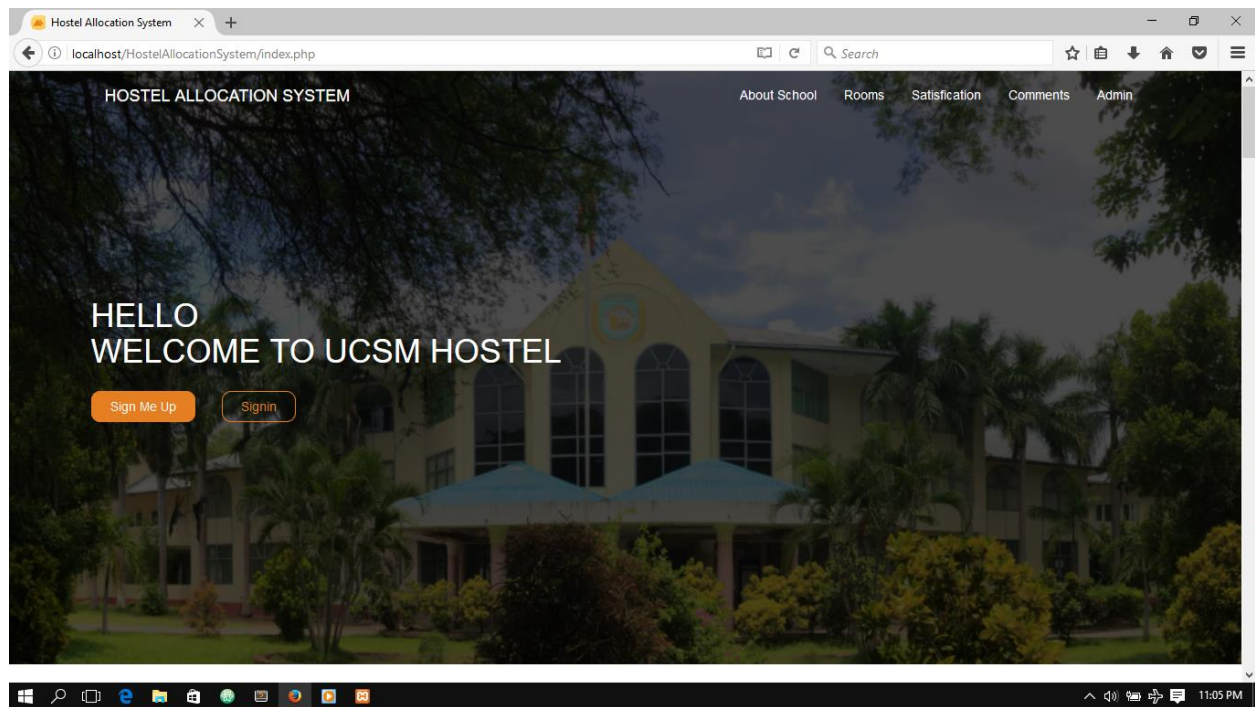

From home page, admin can login to his account by clicking admin menu. For student, student can sign up the register by clicking "Sign Me Up" button. If student already has account, he/she can login to his/her account by clicking "SignIn" button directly.

Student Sign Up

Before sign up form, student has to enter student number and check it wheacher stuedent register to school or not. If student already sign to system, it will show "already signup" message. If student is not registered to school , system will alert "You are not register to school".
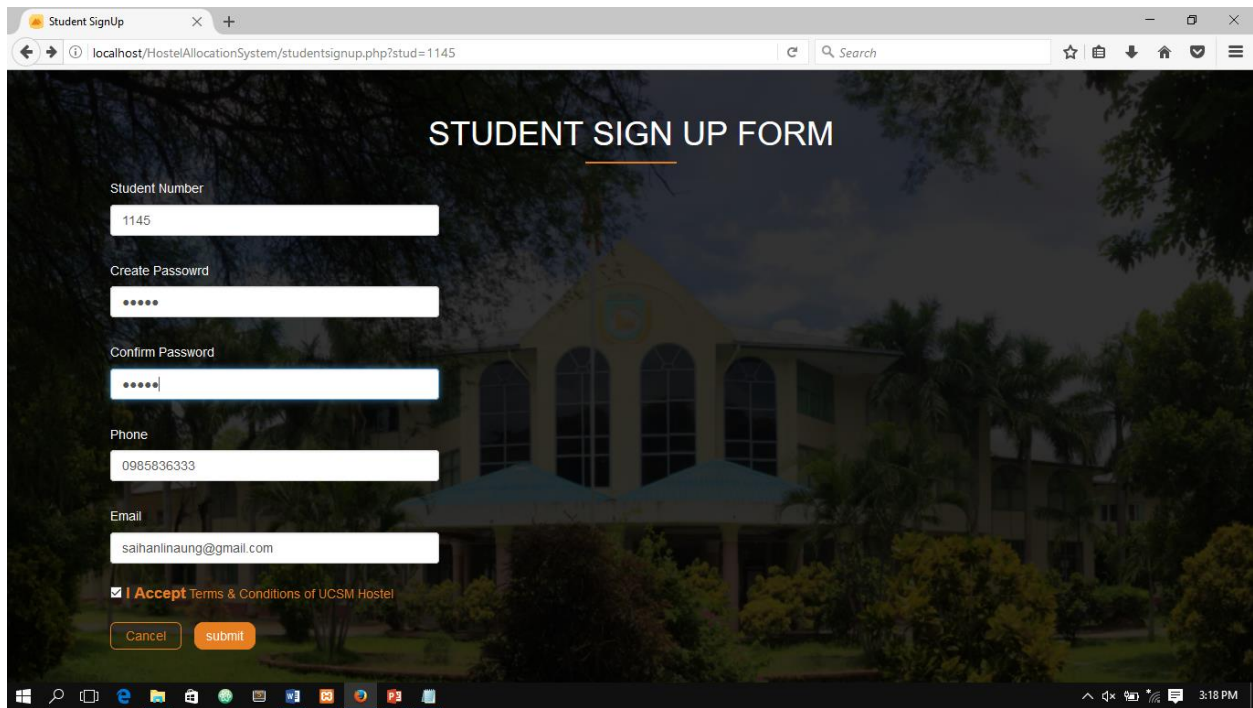

Student Signup Form

When the student number is registered in the database, signup form to the system will show. And then, student have to fill the form and click the check box "I Accept Terms & Condition". If the password and confirm password do not match, system will not allow to sign up. It will show error alert.

Student Dashboard

After student sign up to system, he/she get account to login. In the login form, username is his/her student number and password is the password in the signup process. After login, student dashboard is appearing. In student dashboard, student can update his/her information, making payment and change user password of his/her account.
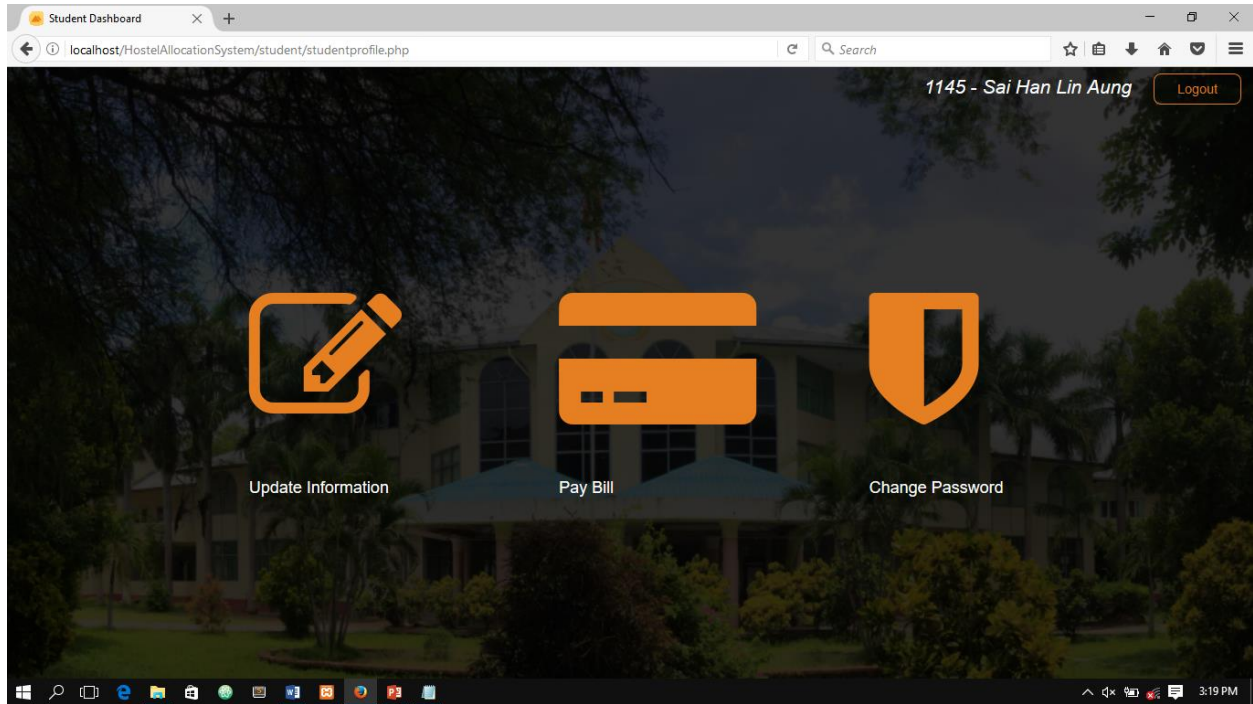

Admin Part User Manual

For security, we do not provide user manual to public. This is only for student to show them how to use the system. For admin, we provide training to customer who buy our system. We only provide training for admin panel using because of important functions such as payment panel and student private information. Admin panel is only for authorized person. We recommend no more than 3 people to use admin account.
